

# 2032 Vision Narrative: Community

EDS is a welcoming, inclusive, diverse, and vibrant society with healthy and eager participation and engagement across geographic, cultural, and technical areas by students, academicians, and industry professionals for robust mutual benefit. Diverse perspectives are amplified and members and leadership see themselves reflected in the organization and its activities equally.

EDS is committed to and invests in the next generation, providing training, seeking and incorporating their perspectives and priorities, and serving as a conduit for professional development, future leadership, and enhancing all career stages.

Local EDS communities provide indispensable professional advancement opportunities, disseminate leading-edge technical knowledge, and promote networking channels with meaningful and enjoyable engagement activities that attract new and ongoing members alike.

EDS leadership, committees, and local communities are in reciprocal dialogue and work collaboratively on member wants, needs, programs, and creative ideas for implementation.

# 2032 Vision Narrative: Knowledge

EDS sponsors rapid technical information exchange, leading conferences, and field focused publications with the best bibliometrics and fastest turn time. Top conferences provide rich opportunities for networking, education and learning, and generate high-quality archived conference content.

Led by its education and technical committees, EDS is the first to provide global content on leading-edge technologies in the field of electron devices which is available anywhere and at any time in multiple formats and languages.

EDS amplifies its impact and reach by partnering with IEEE Societies and Councils, NGOs, and industry partners to generate and disseminate technical content beyond what it can do on its own.

# 2032 Vision Narrative: Impact

Electron Device practitioners enable technologies to serve and benefit humanity.

EDS is in an ever-evolving and thriving state, nimbly and rapidly adapting and innovating through societal and professional changes and shaping the future workforce.

EDS stimulates and organizes local groups to leverage the Society's global technical knowledge to enact and energize positive and sustainable change in underserved communities.

EDS is a sought after societal partner in IEEE to execute high-quality and sustainable humanitarian projects and leverages the expertise of IEEE-wide experts to train project teams to see the greatest impact and inclusion in these efforts.
