

IEEE TRANSACTIONS ON ANTENNAS AND PROPAGATION

A PUBLICATION OF THE IEEE ANTENNAS AND PROPAGATION SOCIETY

APRIL 2024

VOLUME 72

NUMBER 4

IETPAK

(ISSN 0018-926X)

PAPERS

Antennas

- [Compact Scalable Gap Waveguide Phased Array Horn Antenna With an Efficient Decoupling Network](#) Z. Liu, H. Xia, H. Liu, T. Zhang, X. Wu, and L. Li
- [Broadband Dual-CP Multistage Sequential Rotation Arrays With Independent Control of Polarizations Based on Dual-CP Magnetolectric Dipole Elements](#) W. Zeng, X. Y. Wu, F. Wu, Y. Zhang, Z. H. Jiang, W. Hong, and K.-M. Luk
- [Maximum Gain of Lossy Antennas Without and With \$Q\$ -Bounds](#) L. Passalacqua, C. Yepes, A. Murillo Barrera, B. Biscontini, E. Martini, and S. Maci
- [A Compact Antenna Module With Three Coplanar Polarizations for Multi-Input-Multi-Output Applications](#) C. Yang, K. W. Leung, and K. Lu
- [2-D Epsilon-Near-Zero \(ENZ\) Feeding Network for High-Gain Millimeter-Wave Slot Antenna Array Using Bulk Silicon MEMS Technology](#) Y. Zhang, H. Li, Y. Zhao, and Y. Li
- [Magnetolectric Dipole Antenna Framework Supporting Orbital Angular Momentum Modes](#) M. Jofre, Y. Akazzim, S. Blanch, J. Romeu, B. A. Cetiner, and L. Jofre-Roca
- [Effective Spoof Surface Plasmon Polariton-Enabled Independent Cutoff Frequency Control in Wideband Endfire Vivaldi Filtenna](#) A. Zhang, J. Wang, Y. Yi, and L. Liu
- [Differentially-Fed Slot Array Antenna Backed With High-Order Resonating Cavity Loading Slow-Wave Top-Bottom Double Pins](#) X. Zhao, F. Fan, Z. Yan, D. Sun, B. Wei, E. Wang, Z. Wang, H. Zhu, and Y. Li
- [A Reconfigurable Millimeter-Wave Antenna Array With Wide-Range Continuous Beamwidth Control \(WCBC\) Based on Polarization-Mixing](#) F. Zeng, C. Ding, and Y. J. Guo
- [Joint Array Design and Pattern Synthesis Optimization for Flexible Conformal Arrays](#) Y. Jia, H. Chen, M. He, and W.-Q. Wang
- [Deep Learning Design Framework: High-Precision Front-End RFEH for Food Monitoring Applications](#) Y. A. Nando and W.-Y. Chung
- [A Portable VLF Magnetolectric Transmitter With High-Rate Phase Modulation](#) Y. Xu, J. Wu, Y. Du, J. Qiao, M. Zhao, Z. Wang, Z. Hu, and M. Liu
- [Synthesis and Realizability in Design of Minimum-Simulation Inline Antenna Arrays](#) M. Oldoni, S. Moscato, S. Caicedo Mejillones, G. G. Gentili, and C. D'Asta
- [A Novel Compact Wideband Planar Inverted-F Fishbone Antenna With Load-Bearing Capacity and Its Application in CP Arrays](#) S. Yang, J. Geng, K. Wang, J. Lu, R. Zhao, X. Tang, X. Li, A. Zhang, H. Li, E. Li, and G. Tong
- [A Novel Tiling Technique via an Evolutionary Strategy for Large-Scale Irregular Arrays](#) H. Zhao, Y.-L. Ban, Y. Liu, L. Xu, and J. Hu
- [Quantification of Propagation Modes in an Astronomical Instrument From Its Radiation Pattern](#) Y. Yamasaki and H. Imada
- [450 GHz On-Chip Dual-Patch Antennas With Expanded Bandwidth and Filtering Response](#) S. Kong, H.-T. Hu, K. M. Shum, and C. H. Chan
- [Handheld Electromagnetic Scanner for Deep Vein Thrombosis Detection and Monitoring](#) K. S. Sultan and A. Abbosh
- [Insights From the Radiation and Energy Storage Modes of Canonical Dipole Antennas](#) S. S. Y. Cain, E. Wilken-Resman, and J. T. Bernhard
- [An Efficient Optimization Method for Antenna Arrays Using a Small Population Diploid Genetic Algorithm Based on Local RBF Networks](#) F. Peng and X. Chen
- [Compact, Co-Polarized, and In-Band Filtering Cavity-Backed Slot-Antenna Pair Based on Multifunctional Metasurface Diaphragms](#) D. Yi, L. Tang, L.-P. Feng, L.-L. Qian, Z.-Y. Qi, M.-C. Tang, X.-C. Wei, and E.-P. Li
- [A 115–151 GHz Multifeed Active Antenna With In-Antenna Power Combining](#) J. Wan, S. Hu, Y. Shen, Y. Ding, A. Bhutani, T. Zwick, and T. Li
- [Multiobjective Optimization of Wireless Powered Communication Networks Assisted by Intelligent Reflecting Surface Based on Multiagent Reinforcement Learning](#) X. Guan, J. Xue, H. Jiang, and G. Tian
- [An Efficient Inverse Modeling Method Using Translator-Inspired Neural Network and Dual-Annealing for a Compact WPT System](#) X. Jiang, R. K. Pokharel, and A. Barakat
- [A Wideband Dual-Circularly Polarized Series-Fed Corner-Truncated Patch Array Using Coplanar Proximity Coupling](#) D. Wu, J. Liang, and L. Ge
- [A Novel Design Method for Wide-Angle Beam-Scanning Phased Arrays Using Near-Field Coupling Effect and Port Self-Decoupling Techniques](#) Z. M. Xiao, Y. M. Pan, Q. X. Lai, and S. Y. Zheng
